

# **ALPHA MINERAL HEALTH SUPPORT REVIEWS**

## **Mineral Support**

June 20, 2017 by Eddie A (FL, United States)

"The mineral support is a very good product. You cannot get all the minerals you need from food and this is an excellent way to get them."

## **Best Liquid Minerals**

May 28, 2017 by House Doctor P (OH, United States)

"Best Liquid Minerals on the market!!! -House Doctor Pomales-"

## **Feeds my body what it wants**

March 6, 2017 by Robert G

"This works like Minerals need to work. Feeds my body what it wants ."

## **Always the best!**

November 22, 2016 by dluxdlitz

"I've been taking these minerals for many, many years. The improvement and consistency in health levels cannot be understated. Over the years, I've recommended these minerals to most of my friends, and they have had similar results. At this price, you can't find purer, plant derived minerals anywhere!"

## **Highly Prized**

October 14, 2016 by Douglas J

"Your Mineral Support is one of my most valued nutritional supplements. The quality and integrity of your product is, as far as I know, unsurpassed."

## **Miracle Support**

September 1, 2016 by Anonymous

"Never had such strong nails! and now, my hair is thicker and growing quicker. Wonderful support product. I've been using it for about 4 months now, maybe 6. My good girl friend had been telling me about it for years. Hoping my bones are getting stronger, too."

## **brain trauma heart beat irregular**

August 1, 2016 by brian j

"When i first started taking The alpha mineral i did not notice anything. Then I started hearing that brain trauma is healed with Mineral Therapy. I was not taking As much Mineral As the Product recommendation Suggested. So As soon as I raised the dose I began to notice that I required less sleep. In the past I noticed that when I did not get enough sleep I would hear a buzzing in my ears And I would see spots and specs Floating in front of my eyes. These symptoms began to go away the same day that I raised the dose of mineral that I was taking. I had also been experiencing Elevated heart rate. A few times my heart rate Went up to about 145 beats per minute. When that happened my energy level dropped. It seemed to correspond to time in the sun and dehydration. The Last two times I was in the circumstances that normally cause me to have tachycardia I noticed that it didn't happen."

## **Tachecardia**

July 13, 2016 by Cindy L

"I have suffered from rapid heart beat 190 beats per minute (tachecardia) since I was young (Im in my 50s now) The past 5 years it has been getting progressively worse and was happening 3 to 5 times a week and lasted for as long as 10 hours. I was taking magnesium which I read was good for this and it seemed to help a little. I started taking the liquid minerals a few months ago morning and evening. For the first few weeks I saw no change. After a few more weeks there was a marked improvement. It was happening less and was for a shorter duration. For the last few weeks I have only had one episode and it only lasted around an hour. It is the only that has changed in my life so I can only say it is because of the mineral that I am almost cured. Thank God because for anyone that goes thru this, 190 beats per minute for 10 hours is quite uncomfortable to say the least and was completely disrupting my life."

### **stronger nails, better skin**

June 24, 2016 by Anonymous

"After using less than a bottle of the Liquid Minerals I noticed my nails are distinctly stronger, thicker, and do not break as easily. Recently I've noticed my skin looks healthier too - firmer texture, and the appearance of less wrinkles!"

### **Thank you**

May 2, 2016 by richard s

"your vitamins & minerals are excellent- especially compared to centrum and one a day. Those don't work and are a waste of money and time. I worked with 2 different guys who told me that they both shovel the one a day & centrum & other pill types to unclog their "waste" filters. Sometimes the names are still readable after passing thru people. I used to break apart the centrum & one a day pills to at least get SOME benefit. Since I found yours I will NEVER go back to unabsorbable pills."

### **minerals good/bad**

March 26, 2016 by richardspear

"The mineral support is good. Last week i noticed that my snow white hair and beard has been changing to black hair again. My lower jawbone used to be concave UNDER MY TEETH as my body was using that calcium for the rest of my body& now the jawbone has filled in from my TMJ to nearly my front teeth. Years of the U.S. medical doctors NEVER helped my body one bit. Once i researched the minerals subject i realized their (care) was slowly killing me. Each one of us is solely responsible for ourselves and relying on uneducated doctors who only treat with injections & pills is foolish."

### **Great Product**

January 12, 2016 by Fred D

"I don't do reviews often but for this product I will. I read J. Wallach and Ma Lan's book Rare Earths forbidden cures. I realized how important the rare earths are and that they were farmed out of the soil long ago so that supplementing with a product like Alpha Mineral Support is important. I read incredible stories of people living in mountainous regions (where they get the rare earths) living to very advanced ages. My work can be very physically taxing ( I work on a golf course) and many times I am exhausted. But with Alpha Mineral Support the exhaustion is reduced and I am better able to 'bounce back' and perform again the next day or week.I really don't know why but I think for someone at my age (I'm 64) I think you should begin slowly and use as much as you can handle and not necessarily every day. This is a product that can create a revolution in a persons health. This product has the potential to make someone much healthier than people of a similar age. I have also been"
